

Delivery Bring Service

Integration with Bring Nordic Services.

This modification adds a new delivery service: Bring

Please see backend specification at - <https://developer.bring.com/api/booking/>

Notes:

In inventory settings please set - 'Delivery Packages' option to True

Features:

- Add Pre-defined packages.
- Print shipping labels.
- Get parcel tracking info.

Settings

Enable. Settings -> Delivery Packages

The screenshot shows the 'Settings' page in the 'Inventory' system. The 'Operations' section is active, and the 'Delivery Packages' option is checked, indicating it is enabled. The interface includes a sidebar with various modules like CRM, Sales, Website, Purchase, Inventory, Accounting, Project, Timesheets, and Employees. The top navigation bar shows 'Inventory', 'Dashboard', 'Operations', 'Master Data', 'Reports', and 'Configuration'.

Create Delivery Packages

(What you put the goods in)

The screenshot displays the 'Delivery Packages' configuration page. It features a table with columns for Carrier, Package Type, Height, Width, Length, Max Weight, and Package Code. There are three rows of pre-defined packages, each with a checkbox and a plus icon for management. The top navigation bar is consistent with the previous screenshot.

Carrier	Package Type	Height	Width	Length	Max Weight	Package Code
Bring	Bring Box 20x30x40 5 kg	20	30	40	5.00	
Bring	Bring Box 30x40x50 10 kg	30	40	50	10.00	
Bring	Bring Pall 200 kg	120	80	120	200.00

Put in Pack

When the Sales order items are "Done", you need to add them to a "pack".

If you want several "packs" (boxes etc), then add all items to be placed in the first box (by selecting "done"), then press "Put in pack". Then add all items for the second "pack" and press "put in pack" for the second "pack" etc.
